

17:41:20 From The San Marcos Association : What are the exact dates of the Balloon Fiesta pause?
17:41:35 From Raquel Casillas : When you get a chance, I am a Plant Ecologist at a Conservation Lab. I live on 14 near the wetlands area which is very dense with trees and vegetation. Can you describe what fire precautions you have in place for this area and can you forecast when you'll be working at that location?
17:42:23 From Daniel Coyne : Replying to "What are the exact d..."

10/4 - 10/12

17:42:35 From Daniel Coyne : Replying to "What are the balloon festival dates"
17:43:04 From Raquel Casillas : Can you send email answer to santafloraenviroidesign@gmail.com?
17:45:12 From Raquel Casillas : Does TTVFire Dept have a protocol to follow if a fire should break out?
17:52:38 From C Price : I would like to hear again about the vegetation management that is planned where it involves herbicides and perhaps a repeat of the tree trimming or removal. It seems this changed once the work was moved over to NMDOT
17:54:36 From Raquel Casillas : Old San Marcos Trail just south of the old TTVFire Station
17:55:19 From shawn : When is the pause date for this year and restart date for next year?
17:56:07 From Raquel Casillas : The wetland have just been restored. Can they use an arborist to judiciously trim the trees?
18:02:48 From Jessica Weber : You mentioned that you,are going to try to minimize unplanned outages, but there have been an unreasonable number of them lately. I have an autistic child at home. Yesterday, outage resulted in a missed Telehealth visit, a skipped meal (because our oven wasn't available to make her preferred lunch), and meltdowns for the rest of the day due to her schedule being disrupted. This happens every outage and is a real problem for our family. I have never heard of anyone experiencing this number of outages (frequency or duration - these have been hours long), and I'm not hearing anything that gives me confidence that they will stop anytime soon. What steps are being taken to actually address this problem?
18:07:30 From Raquel Casillas : There is now relatively sig water sources at the wetlands site. Can you access that water source until La Cienega can arrive?
18:09:53 From Raquel Casillas : Do you know what class of herbicide is being used?
18:10:59 From Roxanne Darling : sig - significant?
18:11:45 From Raquel Casillas : yes significant
18:11:51 From Jessica Weber : I posted a question
18:13:02 From Roxanne Darling : Could PNM provide some battery backups for people like Jessica? I have a Jackery that works great.
18:13:17 From Jessica Weber : Reacted to "Could PNM provide so..." with
18:14:41 From Raquel Casillas : I'm near Mora/Ocate at the moment. I return home HWY 14 on Monday. Can I call you Dennis? I have tech problems. Sorry.
18:17:56 From Roxanne Darling : But the population is so much denser, And the rock is a big issue.

18:19:12 From Roxanne Darling :
https://www.costco.com/generators.html?brand=jackery&refine=%7C%7CBrand_attr-Jackery
18:19:16 From Jessica Weber : Reacted to "https://www.costco.c..." with
18:19:20 From Raquel Casillas : Thank You!
18:19:48 From Alicia Colv¸n : When we called in to file a claim, we were told we would have to file individual claims for each outage and would likely be dealing with multiple adjusters. Is that accurate?
18:22:30 From Roxanne Darling : I work from home and have a battery backup that keeps my internet and computer working during these outages.
18:22:50 From Alicia Colv¸n : We're a business and were discussing food, wage, and sales loss
18:23:04 From Roxanne Darling : Reacted to "We're a business and..." with
18:23:08 From Alicia Colv¸n : It is
18:23:15 From stevenkrenz : How do you get onto the list for notices of outages?
18:24:00 From Alicia Colv¸n : Heard. Thanks Maggie!
18:24:13 From Maggie Macaulay : Reacted to "Heard. Thanks Maggie..." with
18:25:08 From C Price : Thank You All
18:25:19 From Roxanne Darling : <https://www.pnm.com/outagealerts>
18:25:45 From Roxanne Darling : Steven: that link takes you to the signup
18:26:03 From Roxanne Darling : Replying to "How do you get onto ..."

18:26:24 From ssollien : (833) 910-3670 Work in your area hotline
18:26:33 From Carlos Lucero PNM : PNM Claims Dept. number (855-942-5246).
18:26:39 From ssollien : workinyourarea@pnm.com
18:26:51 From Roxanne Darling : Copy and paste in the chat please?
18:27:13 From Roxanne Darling : Reacted to "PNM Claims Dept. num..." with
18:27:21 From Jessica Weber : Reacted to "PNM Claims Dept. num..." with
18:27:35 From Shelby Magee, PNM Environmental : How herbicide is applied to invasive trees (PNM methods): Clemens, Justin 9/4/2025 6:25 PM , ¤ Hi, when permitted (so not really that often) we use a basal squirt (little gallon pump nozzle) to a fresh cut of garlon 4. Garlon 3 if near water. It's not a broadcast spray and is applied within 20-30 min of cut. Only on removals. So directly to cambium layer of stump.
18:28:16 From C Price : Sign up via text message
Step One: Send a text message containing #REG to 78766 to register for PNM texting. Note: You must send the text from the phone number associated with your account.
Step Two: Send a text message containing #ALERT to 78766 to sign up for Outage Alerts.
18:28:20 From Jessica Weber : Do you expect unplanned outages when you move to the lateral lines?
18:28:27 From Raquel Casillas : Thank you for the herbicide info
18:29:56 From Roxanne Darling : Reacted to "Sign up via text mes..." with

18:30:21 From Jessica Weber : (Will it affect everyone like it is now
- we are off Hwy 14)
18:31:40 From Raquel Casillas : Thank you! Gotta run!
18:31:44 From Jessica Weber : Great, thanks!
18:32:09 From Roxanne Darling : Thanks everyone!
18:32:31 From jkgrantham : Great questions everyone. Thank you.
